

## What is FID STORE?

Fid store is the most valuable player (MVP) of Fidelity token, a unique tool with end-to-end solution for global decentralized e-commerce market.

FDT is designed for traders both locally and internationally to have full control of their business and funds. With the creation of FID STORE verified sellers will be able to create personalized virtual storefronts to sell their goods and services to buyers, making use of Fidelity platform features for a little fee.

We want mass adoption of cryptocurrency, and through Fidelity token, great opportunity will come in to both small and large scale manufacturers, entrepreneurs and even family businesses too will be brought to the fore front. A lot of features will be put in place to ensure things are in order, such as promotion, advertisement as well as a friendly interface.

We hope to harness all the necessary tools we need for promoting goods and services on our platform to other countries markets.

We want to make sure that people around the world benefit from our platform. It is our aim to build an easy to use system with unique features that will allow anyone to create a personal online outlet and would be able to manage it without third party interference or additional expenses.

FID STORE will work transparently while powered by blockchain technology, open and safe for both transaction parties and simplifying purchase processes. This will create huge opportunities for crypto users and also help to educate those who do not have any knowledge about cryptocurrency. This will also help stimulate the growth of fidelity token, as we will be helping businesses start accepting FDT as a means of exchange for their goods and services, providing a safe means of transaction with our in built E-wallet.
